EDUCATION

Bachelors Degree in Data Science

National University of Computer and Emerging Sciences | FAST

Aug 2022 - Jun 2026

Islamabad, Pakistan

PROFESSIONAL EXPERIENCE

Software Developer

Epistemy (Remote)

Sep 2025 - Feb 2026

London, UK

- Reduced teacher review time by **58%** by automating the analytics pipeline from ingestion to delivery.
- Enabled cross-session performance context across **10+ sessions** by designing a Memory agent.
- Lowered LLM API costs by **39%** by implementing a Critic agent to filter low-confidence outputs.
- Delivered full analytics suite within **2 minutes** by parallelizing chunks and agent execution.
- Shortened debugging cycles by **73%** via LangSmith tracing across all production pipeline sessions.
- Sustained 200+ concurrent agent jobs with **99%+ uptime** via BullMQ and Redis on AWS EC2.

AI Engineer

DMLytics

Feb 2025 - Jul 2025

Islamabad, Pakistan

- Lowered flight planning time by **57%** by building flight plan generation from a user-drawn boundary.
- Accelerated preprocessing of **300GB+** imagery by **61%** by automating the full ingestion pipeline on GCP.
- Reduced misaligned tiles by **78%** by engineering image alignment and tilt correction before mapping.
- Shortened map assembly time by **40%** by orchestrating map stitching across drone image captures.
- Enabled crop analytics across **500+ acres** by handing off processed maps and tiles to the ML team.

PROJECTS

MondAI 🔄 **n8n** | **MCP** | **Anthropic** | **GraphQL** | **Prompt Engineering**

- Executed Monday.com board actions in under 3 seconds by building an NL-to-GraphQL agent over MCP.
- Lowered board onboarding time to under 2 minutes by automating manual column configuration entirely.
- Automated 7+ board operations conversationally by designing a prompt-engineered agent with error recovery.
- Reduced failed API calls by 68% by batching all board operations into one validated GraphQL mutation.

StaffSync **n8n** | **Workflow Automation** | **Slack API** | **Supabase** | **Cron Scheduling**

- Lowered HR admin overhead by 91% by building a natural language Slack agent for attendance automation.
- Reduced unchecked-out sessions by 63% by engineering a cron-based agent with employee auto-checkout.
- Cut manual routing for 50+ monthly requests by building a webhook-triggered agent across 8 departments.
- Delivered salary slips to employees in under 60 seconds by automating payroll calculations and Slack delivery.

JobSwipe 🔄 **Python** | **Next.js** | **RAG** | **Llama Index** | **FAISS** | **Redis** | **Scrapling**

- Dropped per-application turnaround time to under 25 seconds by orchestrating a four-agent pipeline.
- Surfaced top 30 job matches in sub 550ms by building a three-stage Matching Agent across 10K+ listings.
- Tailored resumes in under 10 seconds by engineering an Optimization Agent against live job descriptions.
- Scraped job listings across 4 portals by building a Scraper Agent with Scrapling to bypass anti-bot systems.

LaunchMind 🔄 **Python** | **CrewAI** | **GitHub API** | **Slack API** | **Prompt Engineering**

- Reduced idea-to-delivery time to under 120 seconds by orchestrating a 5-agent autonomous pipeline.
- Turned specs into a landing page by implementing an Engineer Agent with automated GitHub commits.
- Drafted Instagram, LinkedIn and X posts by building a Marketing Agent with automated Slack delivery.
- Cut revision cycles by 40% by designing a self-correcting QA Agent that re-triggers underperforming agents.

HONORS & AWARDS

3x Dean's List of Honors | 2x Winner of Hackathon | 2x Winner Debating Contest

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript

AI & Automation: LangChain, LangGraph, LangSmith, CrewAI, n8n, MCP, Webhook Integration

Generative AI: RAG, Prompt Engineering, Context Engineering, FAISS, Pinecone, Chroma

Cloud & DevOps: AWS, Azure, GCP, Docker, GitHub Actions, CI/CD, Linux

Web & Databases: FastAPI, Next.js, PostgreSQL, MongoDB, Supabase
